PROFILE

15 years of experience in multimedia production and project management.

Ability to oversee and complete small and large video productions with clear deadlines and deliverables. Strong attention to detail, schedules, editorial flow, and all phases of video production. High-proficiency editor with the ability to distill large amounts of raw footage/material into concise meaningful stories. Efficient at setting and streamlining processes including compliance documentation, sound mixing, coloring, scheduling, and deliverables.

WORK EXPERIENCE

2023 -

Current

West Virginia Public Broadcasting

CAMERA OPERATOR/PRODUCER/EDITOR

As a shooter/producer of a small government agency specializing in professional marketing videos, I lead a talented team of shooters, editors, and producers to produce impactful content for various purposes. Our expertise spanned across different video formats, including documentaries, short-form videos, educational pieces, live music, and interstitials, which we distribute on various platforms. Our success is attributed to our collaborative approach, with team members contributing to scriptwriting and editing to ensure a refined final product. Emphasizing thorough pre-production planning, we carefully consider time and resource constraints while maintaining a sharp focus on detail. From inception to completion, we were actively engaged in all stages of media production.

2015-

Current

Freelance

CAMERA OPERATOR/PRODUCER/EDITOR

I have experience in network reality television production, working on shows such as HGTV, Magnolia Network, Food Network, MTV's Teen Mom 2, Discovery's Dave Turin's Lost Mine, TLC's 90 Day Fiance, Animal Planet's Saved By The Barn, and National Geographic's Dr. Ole: The World's Most Interesting Vet. Additionally, I have created marketing and advertising content for political campaigns, including scriptwriting, video production, audio recording, and editing. Collaboration with directors, producers, gaffers, grips, and other crew members is something I truly enjoy to capture the perfect shot.
